

## **Policy regarding Man-Made Structures on Trails – P2022-2**

The GHTA Inc. shall modify their “no man-made structures” policy (said policy does not exist in this policy folder – but is handed down through founding documents and club tradition) as follows:

The GHTA Inc. will allow man-made structures under certain conditions so as to minimize the environmental impact brought about by the passage of hikers, with prior approval from the Trails Director, and the Executive; these structures are to be built to a standard similar to those of the Bruce Trail Conservancy and complying with standards of other agencies through whose lands the trail in question passes.

See B-2022-8, April 23, 2022.
